

DSID INITIATIVE

DATA FOR SOLUTIONS TO INTERNAL DISPLACEMENT

Terms of Reference: DSID Operational Product Registry Dashboard

GLOBAL DSID WORKING GROUP

GLOSSARY

Action Agenda (UN Secretary-General's Action Agenda on Internal Displacement)

The overarching global framework guiding nationally owned solutions for IDPs that the DSID Initiative operates in line with.

Assessment

Refers to an individual survey or assessment implemented by governments, UN agencies, NGOs or other data actors that generate primary data or present secondary that is relevant for IDP solutions policy or programming.

DSID (Data for Solutions to Internal Displacement) Initiative

Established by the Special Adviser on Solutions to Internal Displacement in 2021; coordinates with the Global Solutions Hub to support governments, RCOs, UN Country Teams, and partners in generating and using data responsibly to guide nationally owned IDP solutions.

DSID Working Group

The global body bringing together data actors to coordinate and share technical guidance and provide light coordination/technical support to RCOs and UNCTs. Co-chaired by IOM and UNDP; members include OCHA, UNHCR, the JDC, IDMC, JIPS, and IMPACT Initiatives, with EGRIS as an observer.

Expert Group on Refugee and IDP Statistics (EGRIS)

EGRIS is a global multi-stakeholder network established in 2016 by the United Nations Statistical Commission. It creates international standards, methodologies, and guidelines to improve official data collection and reporting for displaced and stateless populations. This includes the International Recommendations on IDP Statistics (IRIS).

Organization Focal Point

The designated agency contact responsible for notifying DSID WG co-chairs when a linked product is edited, moved, or removed from the originating website.

Global Solutions Hub

The Global Solutions Hub is the UN inter-agency coordination platform that facilitates the implementation of the Action Agenda on Internal Displacement.

Lead vs. Supporting Actor

Distinction used in the product intake questionnaire (Q8/Q9) between the organization(s) leading a survey/assessment and those supporting it.

Phase One / Phase Two

The two-part rollout: Phase One (Aug–Oct 2026) is the initial data collection via the Kobo questionnaire; Phase Two (Oct 2026 onward) is the ongoing maintenance under the SOP.

Product

Refers to an existing individual printable document or online resource under each of the three categories presented on the DSID dashboard. Links to these products on the websites of governments or other data actors will be added on the dashboard. Examples include:

- o Category 1: Data and Analysis Products
 - Reports, briefs, factsheets or dashboards
- o Category 2: Technical Guidance
 - Methodological recommendations, survey indicator banks
- o Category 3: Training Resources
 - Training materials, online E-Training modules

SOP (Standard Operating Procedure)

The maintenance protocol to be developed for Phase 2, governing how the dashboard stays updated after the initial Kobo-based data collection phase.

OVERVIEW: DSID INITIATIVE

The Data for Solutions to Internal Displacement (DSID) Initiative was established by the Special Adviser on Solutions to Internal Displacement in 2021. It coordinates with the Global Solutions Hub in supporting governments, Resident Coordinator's Offices (RCOs), UN Country Teams (UNCTs), and partners in ensuring data and evidence is coordinated, generated and used responsibly and collaboratively to guide nationally owned solutions for IDPs in line with the UN Secretary General's Action Agenda on Internal Displacement.^{1, 2}

Additionally, the global DSID Working Group brings together data actors in coordinating and sharing established and emerging technical guidance, as well as facilitating light support to RCOs and UNCTs at the country level in response to requests received through the Global Solutions Hub.^{3, 4, 5} The WG is co-chaired by IOM and UNDP, with members including global representatives from OCHA, UNHCR, the UN-HCR-World Bank Joint Data Center (JDC) on Forced Displacement, the Internal Displacement Monitoring Center (IDMC), the Joint IDP Profiling Service (JIPS), and IMPACT Initiatives. The Expert Group on Refugee and IDP and Statelessness Statistics (EGRISS) secretariat is an observer in the WG.

ABOUT THE OPERATIONAL PRODUCT REGISTRY DASHBOARD

Rationale

In recent years, governments, UN agencies, NGOs and other data actors have strengthened investments in the production of data and evidence to inform policy and programming that supports IDPs in advancing towards solutions. This has been emphasized throughout the Action Agenda, highlighting that effective public policies and responses are impossible without fully understanding the extent of displacement as well as the needs and preferences of IDPs and host communities.⁶

However, despite system-wide efforts to strengthen the quality and relevance of data and evidence to support nationally owned solutions planning, governments as well as humanitarian and development partners commonly face challenges with accessing key information related to Data for Solutions. This is especially common when stakeholders attempt to access existing data and analysis products that can be used to inform solutions policy and programming, as well as relevant resources to support the design of

1 The DSID Initiative 2.0 focuses on supporting collective efforts to bring alignment within the existing data landscape, and facilitate a more robust and joined-up data systems for solutions that allow for a re-orientation of strategy, policy and programme development towards government-led solutions, supported by humanitarian and development actors

2 This was in response to the [UN Secretary General's High-Level Panel on Internal Displacement report \(2021\)](#) and the subsequent [Action Agenda](#), which acknowledged the central role of data in advancing solutions to internal displacement.

3 Note that the DSID Initiative 2.0 was updated following an independent review that was conducted on the original DSID framework. It integrates inputs and feedback from WG members and stakeholders on the first version of the DSID framework.

4 The DSID Working Group coordinates with the Expert Group on Refugee and IDP Statistics (EGRISS), which is mandated by the UN Statistical Commission to develop and support the implementation of official statistics on IDPs. Refer to the International Recommendations on IDP Statistics (IRIS): <https://egrisstats.org/recommendations/international-recommendations-on-idp-statistics-iris/>

5 UN System Chief Executives Board for Coordination, 48th Session: <https://unsceb.org/united-nations-system-wide-approach-internal-displacement>

6 Refer to the DSID Initiative 2.0 Terms of Reference for further details

surveys and assessments and strengthen capacity to generate and analyze data.⁷ While a range of these products and resources exist across various governments' and organizations' websites, they are not currently accessible on a single platform, posing challenges to using available evidence and supporting data actors in designing survey and assessment tools and building capacity to do this independently.

The dashboard has been developed in response to this challenge, enabling simplified access to key data and analysis products, technical guidance, and training resources on a single online platform. The dashboard will be hosted on the official website of the Global Solutions Hub.

Objectives

The DSID Operational Product Registry Dashboard is a public interactive online platform that provides governments and partners with access to available data and analysis products as well as resources that are relevant for developing strong data systems in support of IDP solutions.

The specific objectives of the dashboard are to facilitate simplified access to:

- Products presenting data and analysis that can be used to inform IDP solutions policy and programming, in addition to supporting shared learning and uptake of good survey/assessment practices across contexts.
- A range of technical guidance to support the design and implementation of surveys/assessments and other relevant activities that strengthen data systems to support IDP solutions.
- Relevant training resources that have been designed to strengthen the capacity to design and implement surveys and assessments in line with relevant global frameworks such as EGRIS.⁸

Intended audience of the dashboard

The dashboard is being developed in response to regular requests from governments as well as development and humanitarian partners who are trying to access the abovementioned types of key data products and resources amongst the following groups:

- Government representatives
- RCOs, and UNCTs, NGOs and other data actors at the country level
- Solutions programme coordinators and policy practitioners
- Donors

Importantly, the platform will not aim to provide researchers with raw or analyzed datasets that can be used for additional research. This type of information can be accessed on existing data sharing platforms such as [HDX](#), and instructions on how to access this information will be included on the dashboard.

Complementarity with existing platforms

Importantly, the DSID Operational Product Dashboard ensures complementarity and avoids duplication with separate existing platforms that are administered by partner organizations. This is summarized in the table below.

⁷ Challenges in using available data products to support IDP solutions planning was highlighted in the Global Solutions Hub Global Stock-Take on the Implementation on the Secretary General's Action Agenda on Internal Displacement. See: https://unsdg.un.org/sites/default/files/2026-05/Global%20Stock-take%20report_Final%20Draft%204.pdf

⁸ The Expert Group on Refugee and IDP Statistics (EGRIS) secretariat coordinates the development of statistical recommendations. See the International Recommendations on IDP Statistics (IRIS): <https://egrisstats.org/recommendations/international-recommendations-on-idp-statistics-iris/>

Table 1: Summary of complementarity with existing platforms:

Separate existing platform	How the DSID dashboard ensures complementarity and avoids duplication
OCHA's Humanitarian Data Exchange (HDX) is an open-access data sharing platform that enables centralized access to available humanitarian datasets.	The DSID dashboard will not contain links to datasets and will only provide links to data and analysis products (reports, factsheets, and briefs, dashboards); technical resources; and training materials.
OCHA's Assessment Registry is a global platform featuring a set of tools that can be deployed by OCHA and partners to monitor and track needs assessments at the crisis level.	The DSID dashboard will not contain tools that are designed to be used to support OCHA or partners to coordinate humanitarian needs assessments at the country level. While the dashboard will host products that may fall under the coordination of humanitarian organizations at the country level, it will not contain coordination tools like those listed the OCHA registry.
IDMC's Global Repository of Good Practices is a platform containing resources to strengthen policy frameworks; build displacement governance capacity; account for internal displacement and its impacts; guide investments in risk reduction and prevention; and present strong examples of programmes to support IDP protection and durable solutions.	The DSID dashboard will not contain the types of information that are presented on the IDMC repository. The IDMC repository provides resources that showcase good policy and programming practices addressing internal displacement, while the DSID dashboard provides simplified access to data products, technical guidance materials, and training resources that have been developed by a multitude government agencies, UN agencies, NGOs and other data actors.

Types of information presented on the dashboard

Below is a summary of the type of information that is presented on the dashboard, structured around key types of products that are used at different stages in the production and use of data to support nationally owned solutions planning. Note these are examples only; the dashboard contains more products than those featured below.

Table 2: Types of information to be made available on the dashboard (examples)

Dashboard component (tabs)	Purpose	Examples of information products featured on the dashboard	Type of information products hyper-linked in the dashboard
1. Data and Analysis Products A list of available operational research or assessment products developed at the country, regional, and global levels to inform nationally owned IDP solutions and enable shared learning across contexts	Using data and analysis in support of IDP solutions policy, planning, and programming	Progress Towards Solutions in Mozambique – Report (DTM) National Solutions Pathways Action Plan: Monitoring and Evaluation Framework (Federal Government of Somalia)	Data and analysis products hosting primary and/or secondary data (reports, factsheets, dashboards, policy briefs) Note: links to datasets will not be included in the platform to avoid duplication with other platforms
	Using data and evidence in support of policy development and advocacy	Global Report on Internal Displacement (GRID)- IDMC Periodic Report on the State of Solutions to Internal Displacement (PROGRESS)	Secondary data products, good practices Secondary data products, good practices
	Assessing the national IDP solutions policy landscape	Framework developed by ReDSS	Guidance, good practices
2. Technical Guidance Tools and resources to understand the durable solutions policy and data landscape Guidance to support the design and implementation of operational Data for Solutions to Internal Displacement activities	Assessing the IDP data landscape and identifying gaps	DSID Diagnostic Tool Guidance developed by JIPS Guidance developed by ACAPS	Guidance, good practices, metadata
	Designing and implementing surveys and assessments to monitor IDP solutions	IASC Indicator Library IASC Framework on Durable Solutions for Internally Displaced Persons International Recommendations on IDP Statistics Area-Based Assessment Toolkit for Durable Solutions (IMPACT-IDMC) Solutions and Mobility Index (IOM DTM)	Guidance

3. Training Resources	Accessing online training materials to support in the design of surveys and assessments and use evidence for policy and programming	International Recommendations on IDP Statistics (IRIS): Summary version E-Learning Course (including a dedicated module on IRIS)	Training materials and guidance
------------------------------	---	---	---------------------------------

On the dashboard, users will be able to search for products and filter by type, location (global, region, country), and lead organization. The categorization of products and corresponding search and filter functions on the dashboard will be reviewed every six months by the DSID Working Group, ensuring the platform remains user-friendly.

Criteria for the inclusion of products and resources on the registry

Addressing internal displacement necessitates a system-wide response from governments, UN agencies, NGOs and partners. While data generated across the Humanitarian-Development-Peace Nexus (HDPN) is required to inform solutions planning, the initial version of the dashboard will present information products based on the following criteria.

Note that a product's inclusion in the registry does not constitute formal endorsement of the product's methodology or findings by the DSID Working Group or the Global Solutions Hub.

Table 3: Criteria for the inclusion of products and resources on the registry

Category	Criteria
All categories	All products must: • Be already published and accessible on the websites of relevant government agencies/ministries or other organizations, with functional URLs.
Category 1: Data and analysis products	All data products must: • Have been developed by governments, UN agencies, NGOs or other partners with a specialization in surveys or assessments. • Be a report, brief, factsheet, dashboard, or other online interactive product that presents data and analysis related to internal displacement. <u>Datasets will not be presented on the dashboard.</u> • Feature data that has been collected in contexts where IDPs reside, with a disaggregation of data by IDP status or direct relevance to IDPs. • Contain data and analysis that can be used to support planning, policy, programming and monitoring of IDP durable solutions. This may include humanitarian surveys that contain durable solutions indicators, or other assessments that can be used to inform nationally owned solutions. • Feature data that has been collected through household surveys, key informant interviews, qualitative studies, or infrastructure assessments. This may include primary data and/or secondary data that is presented in the products. • Feature the most recently collected data from the relevant survey or assessment. ◦ If a government or organization has implemented two rounds of a survey covering the same geographical locations, only information about the most recent round should be included. ◦ In cases where an activity has been rolled out across multiple phases – like a survey that covers 10 districts in one phase, and a different 10 districts in the second phase – all information products from both phases should be included. • Contain clear documentation of the methodology used in producing the data and analysis, as well as adherence to data protection and safety protocols based on IASC Operational Guidance on Data Responsibility in Humanitarian Action.
Category 2: Technical guidance	All technical guidance products: • Must contain guidance or recommendations developed by experts with demonstrated experience in the field of data/statistics and internal displacement.
Category 3: Training resources	All training resources must: • Have been developed by experts with demonstrated experience in the field of training and capacity building on data/statistics in contexts of internal displacement.

Adding information to the dashboard

Updating the dashboard will be facilitated by the co-chairs of the DSID Working Group in coordination with government, UN agencies, and NGOs. Updating the dashboard will be conducted over two phases:

- Phase one: Initial data collection to populate dashboard (August to October 2026)
 - o The DSID WG co-chairs will circulate a Kobo questionnaire to WG members and governments requesting to add relevant information about the products to be added to the dashboard (see the questionnaire at Annex 1).
- Phase two: Maintenance of the dashboard (October 2026 and onward)
 - o The DSID WG will establish a Standard Operating Procedure (SOP) to ensure the dashboard remains updated with the most up-to-date products; this will be established by the WG co-chairs and reviewed and endorsed by WG members. This will be developed based on lessons from phase one, incorporating automated digital processes to minimize time and input required from government and other data actors to update data products to the dashboard. This will ensure the dashboard contains an up-to-date registry of relevant products.

Below is an example of data products (category one) that will be collected through phase one, which will be updated on the dashboard.

Diagram: Example of information presented on the country-level product registry (placeholder text)

Location	Date of implementation	Activity name	Government data	Lead organization(s)	Supporting organization(s)	Type of product	Methodology	Product link	Contact
Country X	April 2026	National Internal Displacement Survey	Government	Government of Country X, Ministry of Statistics		Report	Household survey	XXX	XXX
East, Horn and Southern Africa	October 2024	Regional Solutions Analysis	Non-government	UNDP		Policy brief	Secondary data compilation	XXX	XXX
Global	January 2025	Global Solutions Summary	Non-government	IOM		Report	Focus Group Discussions	XXX	XXX
Ethiopia	September 2024	IDP Profiling	Non-government	UNHCR	JIPS	Factsheet	Mixed methods	XXX	XXX
Iraq	June 2025	Iraq Infrastructure Assessment	Non-government	IOM		Dashboard	Household survey	XXX	XXX
Kenya	February 2026	Area-Based Solutions Assessment	Non-government	IMPACT		Report	Key Informant survey	XXX	XXX
Mozambique	April 2026	Solutions and Resilience Assessment	Non-government	IDMC		Terms of Reference	Household survey	XXX	XXX
Somalia	January 2026	Humanitarian-Development-Peace Nexus Assessment	Non-government	OCHA		Report	Mixed methods	XXX	XXX

Visibility

The dashboard will give governments and other organizations the opportunity to showcase their existing products, demonstrating the value of collective contributions to a common platform that serves as a public good. This will include a clear identification of data and product custodianship in the registry. The logos of the Global Solutions Hub and all DSID WG member organizations will be featured on the dashboard to recognize the collective facilitation role played in establishing and maintaining the platform.

Note that the following disclaimer will be made on the dashboard: *The publication of products on the platform does not constitute endorsement of data and analysis by the Global Solutions Hub or the DSID Working Group.*

Additionally, in August 2026, all global DSID WG member organizations formally endorsed the DSID Operational Product Registry Dashboard and approved the inclusion of their agency logos on the platform. These include IOM, UNDP (co-chairs), OCHA, UNHCR, JDC, IDMC, JIPS, and IMPACT Initiatives.

Data protection and responsibility

Only products that have already been published on lead agencies' respective websites will be hosted on the dashboard. As such, the dashboard will not host sensitive information since all data actors have applied strict data collection protocols. The purpose of the dashboard is to provide a single platform to enable easy access to key information products and resources that already exist. For data products presenting data and analysis, only products developed by data actors with demonstrated strict and transparent data protection standards will be presented on the platform.⁹

Additionally, in cases where a published product has been removed or edited by a government ministry or other organization, the below processes will be applied to ensure that up-to-date versions only are available on the DSID platform. This will be incorporated into the SOP to guide the ongoing maintenance of the dashboard (refer to the *Adding information to the dashboard* section above).

Table 4: Scenarios to ensure alignment with data protection principles

Scenario	Process to ensure products remain up-to-date
Data products are edited with the URL on agency's website unchanged	No action needed, the link on the dashboard will automatically be directed to the updated product on the agency's website
Data products are edited with the URL on agency's website changed	Agency focal points email DSID co-chairs to request uploading the new file to the dashboard
Data products are removed from agency's website	Agency focal points email DSID co-chairs to request removing the product from the dashboard

⁹ This will be assessed in line with the IASC Operational Guidance on Data Responsibility in Humanitarian Action. See: <https://interagencystandingcommittee.org/operational-response/iasc-operational-guidance-data-responsibility-humanitarian-action>

Technical inputs and sustainability

The development of the dashboard will be led by IOM and UNDP as co-chairs of the DSID WG in close coordination with all WG members. IOM will lead the technical design and maintenance with the support of a database visualization expert and a database specialist. All databases and digital files will be stored on the IOM HQ server. Feedback from partners will be regularly integrated into the platform to ensure it remains user-friendly and meets the objective and mandates of supporting governments and other partners to easily access key products and resources.

The dashboard's structure, inclusion criteria and maintenance arrangements will be reviewed by the DSID Working Group every six months following its initial publication. The review will draw on the usage of information, user feedback, and consultations with participating organizations.

ANNEX 1: OVERVIEW – DSID OPERATIONAL PRODUCT REGISTRY DASHBOARD; INFORMATION PRODUCT UPLOAD QUESTIONNAIRE

About the dashboard and questionnaire

The DSID Operational Product Registry Dashboard provides governments, RCOs, UN agencies, NGOs and other stakeholders with a single online platform to enable simplified access to key information and resources related to Data for Solutions to Internal Displacement. The dashboard has been developed by the global DSID Working Group.

This questionnaire form is used to capture key information about products that will be presented on the initial version of the dashboard. Three categories of information products will be presented on the dashboard:

- 1) Data and analysis products** – presenting findings from research or assessment products developed at the country, regional, or global level to inform nationally-owned durable solutions for IDPs
- 2) Technical guidance** – including tools to understand the durable solutions policy or data landscape, and guidance to support the design of data activities to support IDP solutions
- 3) Training resources** – materials and training modules to strengthen the capacity for data actors including governments to design and implement surveys and assessments

How the questionnaire works

The respondent will enter basic information about each information product that will be presented on the DSID dashboard. The respondent will enter the number of products per category and then answer a short series of questions related to each information product.

Regarding **Category 1 – Data and analysis products**, note the following criteria to determine which products should be added to the dashboard.

All data products must:

- Feature data that has been collected in contexts where IDPs reside. Data may be collected by governments, UN agencies, NGOs or other data actors
- Be a report, brief, factsheet, or dashboard presenting data and analysis related to internal displacement. Datasets will not be presented on the dashboard
- Contain data and analysis that can be used to support planning, policy, programming and monitoring of IDP durable solutions
- Feature the most recently collected data from the relevant survey or assessment
 - If an organization has implemented two rounds of a survey covering the same geographical locations, only information about the most recent round should be added. In cases where an activity has been rolled out across multiple phases – like a survey that covers 10 districts in one phase, and a different 10 districts in the second phase – all information products from both phases can be included
- Contain clear documentation of the methodology used in producing the data and analysis, as well as adherence to data protection and safety protocols based on [IASC Operational Guidance on Data Responsibility in Humanitarian Action](#)

Data protection and consent

Note that only existing information products that have been published on the websites of governments or organizations will be presented on the DSID dashboard. The dashboard will host only links to the URLs to these existing products, and will not host the products themselves. Therefore the products presented on the dashboard will contain links to access products that have been developed by organizations with demonstrated strict data protection protocols.

ANNEX 2: QUESTIONNAIRE

SECTION 1 — RESPONDENT INFORMATION *(who is filling in the survey)*

#	Question	Response type	Answer options / guidance
Q1	Your name	Open text	—
Q2	Your role / job title	Open text	e.g. Durable Solutions Officer, Data Management Officer, M&E Specialist
Q3	Your type of organization	Select one	- Government - UN agency - International NGO - Local NGO - Private company - Other (please specify)
Q4	Your organization's name	Open text	e.g. Ministry of YY, Government of XXX; Internal Displacement Monitoring Centre (IDMC)
Q5	Your email address	Open text (validated email format)	Must be a valid email address, e.g. name@organization.org

SECTION 2: CONSENT

#	Question	Response type	Answer options / guidance
Q6	Only existing information products that have already been published on the websites of governments or organizations will be presented on the DSID dashboard. The dashboard will host only links to the URLs of these existing products and will not host, store, or reproduce the products themselves. By submitting a link, you confirm that the product has been developed and published by an organization with demonstrated, strict data protection protocols in place, and that its publication complies with any applicable data protection, privacy, and consent requirements of the originating organization. The inclusion of a link on the DSID dashboard does not constitute an endorsement, verification, or approval of the product, its methodology, or its content by the Data for Solutions to Internal Displacement (DSID) Working Group or the Global Solutions Hub. Responsibility for the accuracy, quality, and legality of the linked product remains solely with the organization that produced and published it. By giving consent, I confirm that I have read and understood the above, and I consent to submitting this link for inclusion on the DSID dashboard.	Note	NA

#	Question	Response type	Answer options / guidance
Q7	Do you consent to adding links to information products?	Select one	Yes No (if selected, survey ends)

SECTION 3: TYPE OF INFORMATION PRODUCTS

#	Question	Response type	Answer options / guidance
Q8	What types of products are you requesting to upload to the DSID dashboard? (select as many that apply)	Select multiple	· Data/analysis products · Technical guidance · Training resources

SECTION 3.1. DATA PRODUCTS – NUMBER OF SURVEY/ASSESSMENT ACTIVITIES

#	Question	Response type	Answer options / guidance
Q9	How many different survey/assessment activities will you be uploading products for? An activity refers to a survey or assessment that uses the same name and methodology in one or more countries, e.g. an MSNA	Number (0–20)	e.g. 10

SECTION 3.2 DATA PRODUCTS – ACTIVITY INFORMATION

#	Question	Response type	Answer options / guidance
Q10	What is the name of the survey/assessment?	Integer	· e.g. Durable Solutions Assessment
Q11	Which government ministry/agency, UN organization, NGO, or other data actor leads this survey/assessment? If multiple organizations lead the survey, select the most relevant.	Select one	· Organization list (draft, to be finalized): · Government/ministry (please specify) · RCO · IOM · UNHCR · UNDP · OCHA · UN-Habitat · UNICEF · World Bank · African Development Bank · NRC · DRC · JIPS · IDMC · IMPACT Initiatives / REACH · ReDSS · Other non-government organization (specify)

#	Question	Response type	Answer options / guidance
Q12	Which government ministry/ agency, UN organization, NGO, or other data actor supports this survey/assessment? Select as many that apply	Select multiple	· Government/ministry (please specify) · RCO · IOM · UNHCR · UNDP · OCHA · UN-Habitat · UNICEF · World Bank · African Development Bank · NRC · DRC · JIPS · IDMC · IMPACT Initiatives / REACH · ReDSS · Other non-government organization (specify)
Q13	What geographical level does this assessment cover?	Select one	· Global · Regional · Country · Subnational
Q14	What methodology was used in this assessment? Select the most relevant option	Select one	· Household survey · Key Informant Interviews · Focus Group Discussions · Mixed methods · Other (please specify)
Q15	What is the frequency of this assessment? Select one	Select one	· Annual · Bi-annual · Other (please specify)
Q16	What is the highest admin level that data can be aggregated to? Select one (skip if irrelevant)	Select one	· Global · Regional · Admin 1 · Admin 2 · Admin 3 · City · Neighbourhood · Site · Facility
Q17	What is the lowest admin level that the data can be aggregated to? Select one (skip if irrelevant)	Select one	· Global · Regional · Admin 1 · Admin 2 · Admin 3 · City · Neighbourhood · Site · Facility

#	Question	Response type	Answer options / guidance
Q18	How many Data and Analysis Products will you upload related to this assessment? This includes reports, briefs, factsheets, or dashboards. Only include products that have an active URL link	Number (0–15)	This number determines how many times the Analysis Product block below repeats
Q19	Assessment focal point name (if you are the focal point, add your own name)	Open text	e.g. Mohamed Abdi
Q20	Assessment focal email address (if you are the focal point, add your own email address)	Open text	e.g. mohamed.abdi@ngo.org

SECTION 3.3 DATA AND ANALYSIS PRODUCTS - PRODUCT UPLOAD (repeated once per product for each activity, as specified above)

#	Question	Response type	Answer options / guidance
Q21	What type of product is this? Select one	Select one	· Report · Brief · Factsheet · Dashboard · Other (specify → Q18.1)
Q22	What is the name/title of the product?	Open text	e.g. Factsheet – Eastern State
Q23	What month and year was this product published?	Date (month-year picker)	e.g. October 2025
Q24	Provide the URL link to access this product	Open text	Full URL
Q25	Provide the URL to access the Terms of Reference with this product (skip if irrelevant)	Open text	

SECTION 4.1. TECHNICAL GUIDANCE – NUMBER OF PRODUCTS

#	Question	Response type	Answer options / guidance
Q26	How many different Technical Guidance products will you upload?	Number (0–15)	10

SECTION 4.2 TECHNICAL GUIDANCE – PRODUCT INFORMATION

#	Question	Response type	Answer options / guidance
Q27	The following set of questions refer to each Technical Guidance product you will upload		

#	Question	Response type	Answer options / guidance
Q28	Which government ministry/agency, UN organization, NGO, or other data actor developed the Technical Guidance product?	Open text	Organization list (draft, to be finalized): · Government/ministry (please specify) · RCO · IOM · UNHCR · UNDP · OCHA · UN-Habitat · UNICEF · World Bank · African Development Bank · NRC · DRC · JIPS · IDMC · IMPACT Initiatives / REACH · ReDSS · Other non-government organization (specify)
Q29	How many Technical Guidance products will you upload?	Number (0–15)	· This number determines how many times the product block below repeats

SECTION 4.3 TECHNICAL GUIDANCE – URL UPLOAD (repeats for each product, as specified in Q24)

#	Question	Response type	Answer options / guidance
Q30	What is the name of the Technical Guidance product?	Open text	Durable Solutions Indicator Recommendations
Q31	Provide the URL link to access the product	Open text	Full URL; only asked if the product is published

SECTION 5.2 TRAINING RESOURCES – PRODUCT INFORMATION

#	Question	Response type	Answer options / guidance
Q32	The following set of questions refer to all Training Resources products you will upload		

#	Question	Response type	Answer options / guidance
Q33	Which government ministry/agency, UN organization, NGO, or other data actor developed the Training Resource product?	Select one	- Government/ministry (please specify) - RCO - IOM - UNHCR - UNDP - OCHA - UN-Habitat - UNICEF - World Bank - African Development Bank - NRC - DRC - JIPS - IDMC - IMPACT Initiatives / REACH - ReDSS - Other non-government organization (specify)If 'Other' is selected, follow-up Q28.1 opens to specify the organization
Q34	How many Training Resource documents will you upload?	Number (0-15)	This number determines how many times the product block below repeats

SECTION 5.3 TECHNICAL GUIDANCE – URL UPLOAD (repeats for each product, as specified in Q29)

#	Question	Response type	Answer options / guidance
Q35	What is the name of the Technical Guidance product?	Open text	e.g. Durable Solutions Indicator Recommendations
Q36	Provide the URL link to access the product	Open text	Full URL
